## Online Conductive Home Tuition Programme

### Allowing the sessions to run smoothly

Welcome and thank you for enrolling into our exciting new service to enable your child to access live online Conductive Education programmes in the comfort of your own home.

Below you will find some tips to help the sessions run smoothly and ensure success.

- Once you have enrolled, we will email you a 'Zoom Link' which will take you onto the conference page. Depending on the device you will be using you may need to download the free Zoom app.
- Zoom can be accessed via smart phones, ipads, laptops and desktop computers. In this instance **we recommend lap tops** as they are portable and have a big screen.
- Please ensure the lap-top is **fully charged**.
- Ensure that you have any equipment or aids ready and available and distractions are kept to an absolute minimum.
- We will allow a few minutes before each session begins to check all links are working, microphones and video are active and everything is set up and ready to go. Zoom is really simple to use, please be patient whilst any initial technical issues are ironed out to begin with.
- Have fun with this new way of working and show your child that you are confident, even if some of the techniques you may use will be a little unfamiliar at first, we will guide you so that success is assured.
